# WHITEPAPER: POLYB PARIS (USDTz)

Stability Ecosystem on BNB Smart Chain

## 1. PROJECT OVERVIEW

**PolyB Paris** aims to provide a stable and secure payment infrastructure on the BNB Smart Chain. Through its core token, **USDTz**, PolyB Paris enables fast transactions with zero volatility, pegged to the value of the US Dollar via USDT.

## 2. TECHNICAL SPECIFICATIONS

- **Token Name:** USDTz
- **Symbol:** USDT.z
- **Network:** BNB Smart Chain (BEP-20)
- **Official Contract Address:**  
0xC67952983C0d7Ecff9993587cc13038606927c09
- **Total Supply:** 1,000,000,000 USDTz
- **Decimals:** 18

## 3. STABILITY MECHANISM (THE PEG)

USDTz maintains its 1:1 parity with USDT through a concentrated liquidity pool on **PancakeSwap V3**.

- **Trading Pair:** USDT / USDTz
- **Fee Tier:** 0.05% (Optimized for Stablecoins) This mechanism ensures permanent convertibility and price stability for holders against crypto-market fluctuations.

## 4. GOVERNANCE & TRANSPARENCY

The project is managed by the entity **Poly Bat Parisienne**. To ensure the high transparency standards required by DeFi:

- Project updates are available on the official website: [www.polybparis.com](http://www.polybparis.com)

## 5. SECURITY NOTICE

Liquidity pools are monitored 24/7 to ensure the "Peg" (parity) is maintained. PolyB Paris is committed to increasing USDT reserves in alignment with token adoption across the network.
